

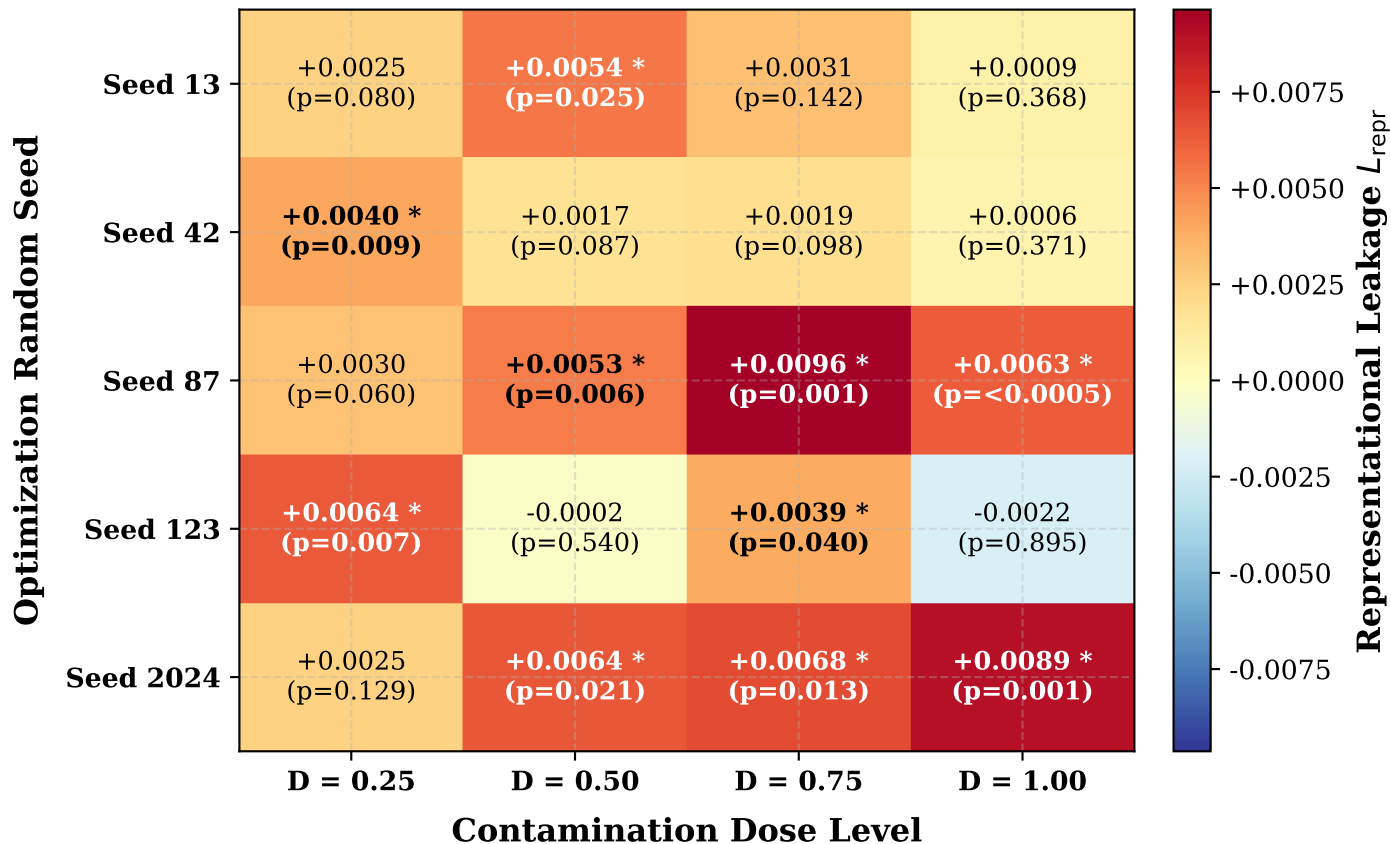

Figure 2: Branch-Level Effect & Nominal Significance Heatmap
Cell: L_{repr} and Monte-Carlo p-value (* nominal branch-level $p < 0.05$)

* Denotes uncorrected nominal branch-level $p < 0.05$ (one-sided right-tailed paired sign-flip permutation test, $B=2000$).
 Note: Protocol v1.2.4 did not preregister an omnibus global test; significance is nominal branch-level only.
